

To: FCC

I was made aware of the LPFM stations may to take priority over some current FM translator services. In doing so It may force or change my current listener supported radio station K-love 94.3 Elgin, IL. I support this station because It broadcasts local events, music and programing that other stations don't. It is clear the public supports the station because we like what k-love stands for in our communities and we do not want to lose this important radio station. thanks for your time in this matter  
Andrew Hopkins
